Wayne Helix™ Fuel Dispensers

Wayne
FUELING SYSTEMS

Designed for you.

The Wayne Helix fuel dispenser line was designed for you. With user feedback from across the globe influencing the design, these dispensers provide the features motorists asked for; the benefits that distributors, fleet owners and retailers profit from; and a design that service-technicians find easy to maintain.

Engineered for the world.

The Helix fuel dispenser is the first-ever global family of fuel dispensers, representing the best of everything Wayne has to offer. We've designed and engineered our Helix dispenser line to comply with the world's highest safety standards and meet the ever-evolving fueling demands of customers in the 145 countries Wayne serves.

Technology
so advanced,
you'd swear
it's from
the future.

① The Fuel Dispenser:
Redesigned + Reconceived

Designed and engineered on a single global platform, Wayne Helix dispensers emphasize intelligent design, advanced technology, safety and security.

② Intelligent Design

Wayne and IDEO, a renowned design and innovation consultancy, conducted global market research and created the Helix dispenser's design and iconic style based on user feedback from distributors, retailers, technicians, and motorists.

③ Safety + Security

Helix dispensers meet IEC and UL safety standards while addressing a wide variety of safety concerns. From payment transactions to secure internal dispenser components, the design of the Wayne Helix dispensers helps deter and detect product tampering and fuel theft.

④ Advanced Technology
+ High Quality

Helix fuel dispensers incorporate global components, innovative metering and durable materials. Using the best of Wayne's advanced technology creates a superior fueling experience now and for the future.

Meet the Helix family.

One global dispenser platform, five models to address your needs. The Wayne Helix dispenser family is highly configurable, addressing the specific needs of users no matter their fueling demands.

Helix™ 1000 Fuel Dispenser

Condensed Simplicity

The Helix 1000 dispenser holds the smallest footprint in the Helix family. Equipped with the same Wayne DNA and core technologies as the rest of the family, the Helix 1000 dispenser is ideal for customers looking for basic features, high quality and reliability.

Helix™ 2000 Fuel Dispenser

Compact Workhorse

If you're working within a confined site, the Helix 2000 dispenser delivers practicality and the latest features in a small package — ideal for small service stations that want the latest in technology and usability. Available both as lane- and island-oriented models.

Helix™ 4000 Fuel Dispenser

Big Player, Small Profile

With the smallest footprint of the H-style models, the Helix 4000 dispenser offers a sleek and iconic look and can accommodate up to three meters and up to four hoses. Take advantage of multiple configurations, blending and non-blending, payment, and variable flow rates.

Meet the Helix family.

Helix™ 5000 Fuel Dispenser

Core of Flexibility

The Helix 5000 dispenser boasts the aesthetics and capabilities of the Helix 4000 dispenser, but has greater flexibility that can handle up to four meters and up to an eight-hose configuration.

Helix™ 6000 Fuel Dispenser

Ultimate Scalability

The Helix 6000 dispenser consolidates all the nozzles with the option to deliver up to five products, including alternative fuels, in a scalable framework that helps to optimize the dispenser size and layout for your forecourt. All hoses, hidden within the hose handling cabinet, are gathered on one side of the display area.

Industry-leading features that reflect the very best of Wayne

INTELLIGENT DESIGN

Separation of “clean” and “dirty” areas — Helps keep hoses, dirt and fuel away from the user interface, drawing users’ attention to the branded areas and payment terminal

Slim, attention-getting profile — Openness from the side and a streamlined, refined profile are appealing to customers and give station attendants a better view of the forecourt

Large-panel hydraulic cabinet doors and valances — Provides uninterrupted branding space to boost merchandising real estate

Weld-free exterior and framework — Reduces catalyst points for corrosion, helping to lower maintenance costs and maintaining the appearance of the dispenser

Compact footprint — Installs over existing Wayne footprints and most sumps, helping to simplify installation and reduce retrofit costs

SAFETY & SECURITY

EMV® compliance and upgradeability — Provides full compliance with global EMV payment security standards as well as easily upgradable EMV-ready options

Enhanced visibility — Promotes assurance of personal security through improved visibility over, around and through the pump

Wayne iX™ Technology Platform — Built on a single, global technology platform, enabling configuration flexibility that easily meets specific regional requirements

USER INTERFACE

Intuitive user interface (UI) and large, bright display digits — Features angled unit price displays above the push-to-start buttons and white-on-black digits for clarity in outdoor environments, providing easier reading, day and night
